Norton Password Manager is a simple yet effective way of securing your account on any website that requires a login. As a password manager, the Chrome extension brings a newly built-in password generator that allows you to create unique passwords for all of your accounts, directly from the app. With wallet information, like credit cards and bank accounts, you can fill the required forms from a website way more quickly, with the help of Norton Password Manager. Stay secured all the time With this extension, you can have no fear of losing a password, as all of them are stored in an encrypted vault that only you have access to. The extension seems very reliable in managing your passwords and provides a clean interface that complements the seamless experience. Norton is a name famed for its proficiency in antivirus and anti-tamper protection services. And that alone can confer you a sense of security and certainty that it is a reliable product. Easy to create a password or use your saved credentials When you click on its icon from the toolbar, a window will pop-up with all the logins found in your browser and how many of them are for the current page. In case you are not logged in yet on a website, it can fill in your credentials for you or, if they aren't in the vault, it can add them as soon as you log in manually. By clicking on the three dots from the extension's window, you will have access to the Password Generator page. Here, you can create your custom password by choosing its length and which types of characters should be used. In a world full of unsafe online places, this might help All

## Norton Password Manager For Chrome

KeyM Macro Generator makes it very easy to record any keystroke and then replay that keystroke sequence later. How? You record a sequence of keystrokes by holding down the Shift key and then pressing any key. If you want to record anything else (like Ctrl+L) or add a prefix (like Shift+Ctrl+L) use the macro recorder to set the key strokes you want to use. You can then later replay the keystrokes you recorded by using the Replay Macro feature. What's New in This Version: Added the Replay Macro feature that allows you to replay a Macro set with the Shift+Ctrl+L keys. Also added a help message for the Record Macro button. NOTE: KeyM Macro can record keys from most browsers but may not work on all web browsers. For example, I tested it with the latest version of Firefox and did not work. This app has no advertisements More Info: Login with Facebook FREE - Login with Facebook - Completely Free 100% Safe - use and Enjoy! Login with Facebook - Completely Free! - Facebook is the most popular social media site today and as such, has a lot of features that users can leverage to build their social network presence.
