System Requirements:

All drivers require a copy of the Xbox 360 system software. Once installed, there are several steps that must be followed in order to have the X360 Driver installed correctly. A) The only prerequisite for an X360 driver is that the system on which it will be installed must have an XBOX 360 Arcade or Xbox 360 games console. If the system does not have an XBOX 360, then you will not be able to install an X360 driver. B) If you already have an X360 driver installed, it will not be installed or updated again.
