I am trying to use the drop down to add a new string. I have tried both using `key = value` and using `key = tName + " " + value`. The problem is that it gives me a single key value pair every time I use it. I have tried using the key in two methods, one using the parse function and the other using the remove method. I'm currently using the remove method but I am not sure if that is going to be a
