5.0 The graphics look great, but they don't really go anywhere with the score. The music was ok, but nothing I saw looked very interesting. The graphics are very good, and they vary a bit, like the forest, desert and plains. The story is pretty well written, and the characters easy to understand. My only problem with the game is that your choice in the character is very limited. You can only pick from two races, you can only choose 1 of the 2 main characters to play, then you can't choose someone else at all. It would have been nice to have even more choices. However this game is a must buy for any RPG fan, just wait until they come up with a decent story and more characters. THE NEW FANTASY ACTION RPG. ◆ The story so far What we are today is not a mere trifle or a piece of seasonal entertainment. It is the result of my illness. But what is that illness? It is a disease born of the ever-failing weak and indecisive people. Although I am a great being, it is people who have no choice but to be weak and indecisive that I have to contend with. Now then, I must not put up with that. That is why I have gathered the most powerful people who can share my power and am trying to create a new world in the old names of my enemies. My Enemies: The Elves The Elves are a long lost race of noble people who live within the precious lands of the Elden Ring. No, that is not mere fantasy. This is reality, though it may have seemed too incredible to believe. However, by re-creating the Elves of the old world of the Elden Ring, I hope to discover what human society was like. I am gathering the people who are currently isolated from society, teaching them to rely on themselves, and urging them to develop a new, powerful nation. I am making them into the new civilization of the Elves of the Elden Ring. I am the Great Dower. THE DEFIANCE of the Elves: They know about the coming of a new world, and the existence of a young woman. They secretly monitor the development of our society.

However, they do not understand that I am a Great Being. Since their birth, the Elves have cherished childish views. Because of this, I have to continue to create the world by birth. They lack any movement of thought, and no matter how much I give them, they are unable to move or act. THE WAR of the Elves: I am trying to create a true new world. I need the greatest strength. However, the Elves refuse to fully join with me. It is a secret war that I am waging with the elves without fighting for them. They only kill me in their dreams. Now then, Elves, if you want to live, make way for us! ♦ The future The series of event will lead up to the following: The Elves will begin to move, assemble, and fight me one by one. I shall begin

Impact of Highly Fluorinated Silicon-Based Amorphous Solid Dispersions on Pharmaceutical Performance. The impact of potential deleterious interactions between an organic solvent and a non-polar drug, the lack of adjustable tight binding between the drug and polymer, and the need to undergo a complex amorphization and dispersion process as a final step of formulation were a major concern when making linkers for amorphous systems. Nevertheless, the reported drug loading (DL) values for silsesquioxane-based amorphous solid dispersions (ASDs) are in the low milligrams per gram (mg/g) range. To optimize the conversion efficiency and DL, the impact of silicon and fluorine substitution on the formation and solid-state properties of silsesquioxane-based ASDs (SSQ ASDs) was investigated. A series of SSQs bearing different fluorinated sidegroups (60, 100, and 150 wt % of fluorine) was prepared and subjected to crystallization-induced morphological changes. The obtained glass transition temperature (Tg), particle size, and Tg variance were compared to the cryo-transmission electron microscope (Cryo-TEM) images. The stability of the quenched amorphous liquid state (QAL) in drug-polymer slurries at 25 °C was also investigated. The conversion efficiency of these SSQs in dispersing celecoxib into amorphous form at 25 °C was improved by optimizing the fluoroalkyls chain length. The μ -QSAR analysis of the

interactions between the polymeric chain and celecoxib at the molecular level revealed the ranking order of the Tg values, with the highest
