LOGistical 2: Tuvalu is a city building puzzle game with a huge map of the world. Similar to others of its kind, it offers players to put their cargo to good use, move it between different destinations and, in the end, complete the map of the whole world. So your task will be to deliver cargo through the country and the world. You can get the needed resources from the different regions. Complete the contracts and earn bonuses. With a bunch of different trucks and upgrades, you can transport different resources from the start. Put the necessary pieces together and you will be able to build bridges. You can expand the roads, railways and airports to facilitate your delivery, and create industries to make it even easier. Cargo and resources are consumed as you move your trucks. There are different levels of cargo and you will need to produce additional cargo at the industries. The industry is the one where players use different techniques to create their commodity, and they also need raw materials like fuel and oil, as well as workforce, and the more they produce, the more they earn. Not only can you travel, you can also use ferries to transport cargo across the different water areas. If your cargo is out of the reach of your truck, you have a chance to put it into quarantine so you can travel across the water and load it on to the boat or ferry. You can also find a number of different lodgings and shops that your fellow players can use. It is possible to complete the map in multiple ways, but you will need to keep moving your resources in order to get all the achievements and unlock the new content! The game has been updated with new features, challenges, roads, industry placements and a lot of other improvements. What's new in Nightmare Party:

Ultimate Edition Here you are, at the Crossout, for a night in the future. Everything is running out of control and you've barely managed to survive. It's up to you to keep your head above water and avoid being found by your new comrades in arms. Trick is a fluid game, with quick reflexes it's easy to learn and play but don't slacken off if you want to score that next point... it's just not possible!

- Play the action strategy game, with a selection of weapons, abilities, mods and traps
- The game runs on no installation, only one save file
- Aim for global ratings, not just your tourney scores

This user has not even started a tournament yet, it's simply his championship - or his last one. It's already like that, but he wants to try for a quick practice before his tournament begins. He's on his last adventure, so for the purposes of challenge and scoring he's simply counting as one timer/round already. All scores are from events using the official gameplay. Examples: The TOTS Score scorecards from Tournaments do NOT roll over events - there cannot be more than one display value for that event. Any questions don't hesitate to ask. I was hoping it'd work for the 3.2 1 hour activation thing. Sorry, I never knew it would shut down! The screen before it disappears is awful too." Hello! A quick question. I was playing a couple of games a while back, my first one took me like... 3 minutes to even load, but one game took 30+ minutes to load, including info and icons. It's almost like it was loading every quest on purpose to take so long. Is there a way to
