The CadSoft Eagle Professional.How to Keep Quinoa Green in Your Fridge Quinoa should be kept in the refrigerator, where it will keep almost indefinitely (it has a shelf life of about one year). It doesn't store well for longer periods because it will go a little green. We had some quinoa in our fridge that'd gotten a little past its prime, and it didn't look quite as good as we'd hoped when we moved it

in with the kale, broccoli and other fresh ingredients. If you know you're going to get some quinoa that's a little past its prime, here's the best way to store it so it doesn't get any worse in the fridge.

Quinoa green is a result of quinoa seeds sprouting a little bit. The seeds can get a little bitter and/or a little green, but it's a good sign that they're still pretty good and healthy. It's similar to when wheat sprouts a little green around the edges, and it doesn't actually mean the wheat itself is bad. Here's what you'll need:

Quinoa - Enough to fill one bowl
Salt - A little extra salt isn't a bad thing at all
A spoon - Also, a sharp knife or scissors would probably work well here
Here's how you use it
