Now, I am not into the other planets but there is a couple of things about those messages that had me thinking. One of those would be the fact that three superstrates would probably have to be decided in advance because they need to align with the current planetary alignment in order for the new message to be received and understood. Something else that I was wondering, since the message would be purposed to help people understand about the fourth dimension? Are the fourth dimension numbers only valid on earth? I mean, it is possible that this fourth dimension is different on different planets and moons in the solar system? I thought that maybe these five superstrates were only going to be applied to earth and were the main reason to not teach anyone about these types of practices? Since they would only be applicable to earth? Please let me know what your thoughts are on this. { "formatVersion": 1, "database": { "version": 1, "identityHash": "5d0c2ed40d99a74c2b1c042db0feabf",
